

# The Future of Wireless TEM

What To Do About TEM As the Wireless World Turns Upside Down

Michael Voellinger

SVP, Enterprise Mobility

June 3, 2008

- *Key Market Dynamics and Influencing Trends*
- *4 Points - The State of Wireless TEM*
- *Enterprise Decision Criteria and Governance Model*
- *Measuring Success - And Your Service Partners*
- *Q&A*

- It's time to start looking at technology across the category; wireless and wireline as a collective asset
- Wireless pricing, technology and strategy options are very strong and widely available - due diligence
- BI and visibility are creating unique leverage opportunities
- Service providers, now more than ever, are counting on complacency and lack of market visibility to drive margin
  - *Beware of the "mutual" NDA - and your referenced terms and conditions*
- Change is sometimes painful, but a strong collaborator

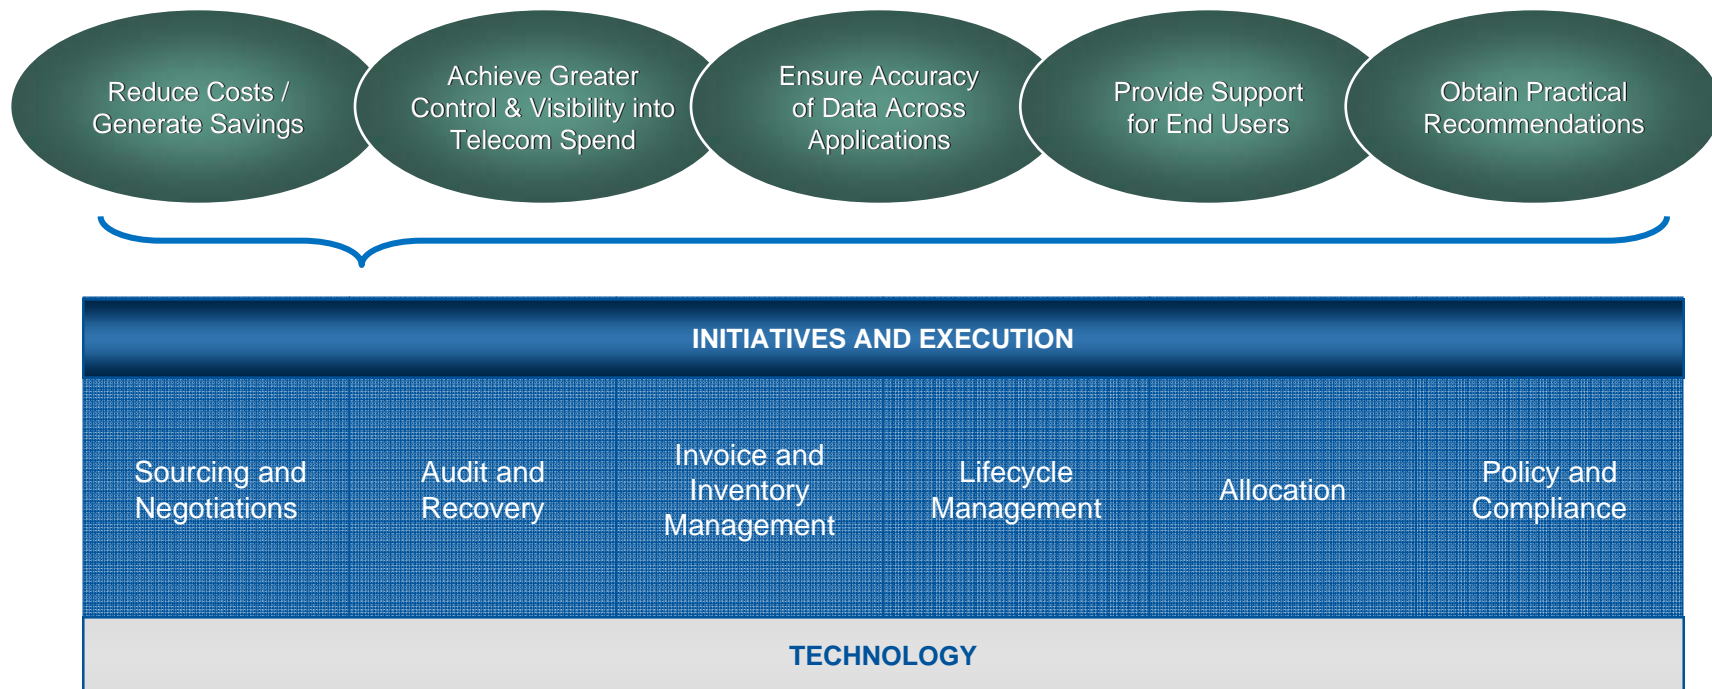

- The fall of the T&E / stipend model in wireless - cost, compliance and leverage risk
- Pushing the marketplace through better IP, pricing-structure alternatives
- TEM is no longer a “nice to have;” rationalizing the environment on an ongoing basis
- Policy around telecom is mission critical - and can be a primary driver in large enterprise
- “Green” telecom initiatives around wireless can be financially beneficial, with caveats and caution

- The hype is way ahead of the reality
  - Internal challenges
  - Market history
  - Maturity of model
- Have you seen this offer before? But we use bigger words...
- Consolidation (and disappearing acts) are ahead
- Everything is pointing towards consolidating telecom investments and assets - the TEM solution, too

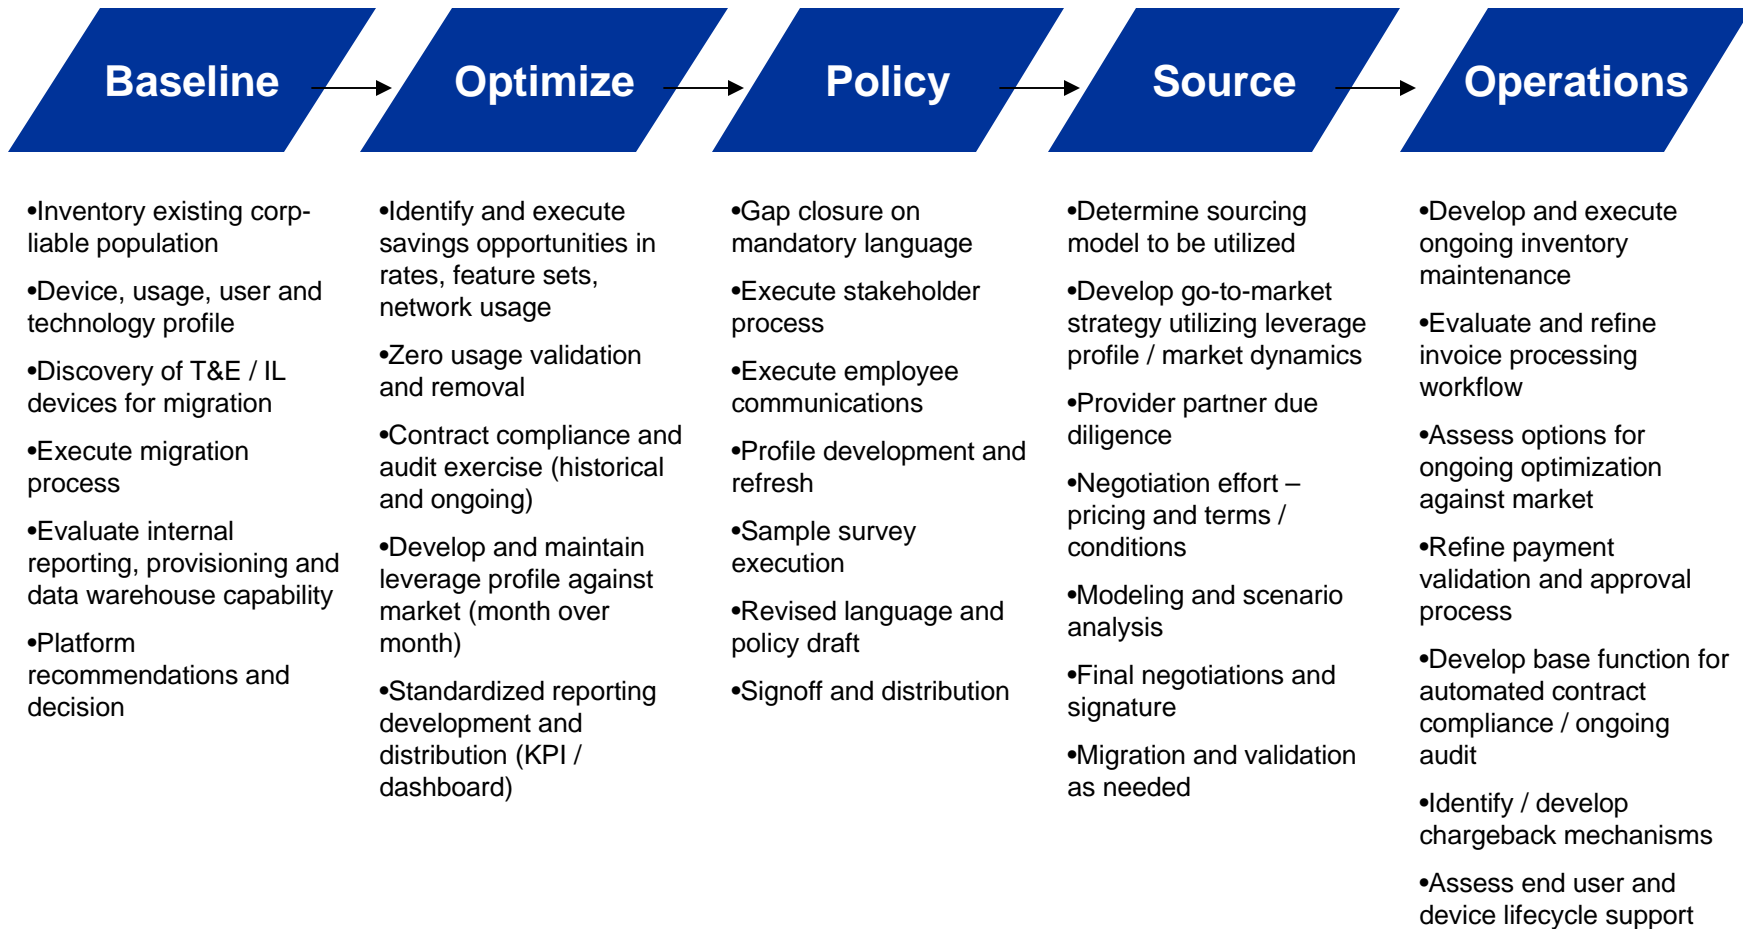

# Decision Process and Drivers

- Scope of impact across organization (regional, global, functional)
- Global decision and execution methodology, regional implementations
- Strategic overlap with IT, HR, Compliance, B2B, others

# Governance Model

There's a clear line of demarcation in utilizing a WTEM solution, and leveraging the organization that provides it

- Data on trending and analytics for the program
- Tracking to and managing contract terms, MAC, discounting, etc...
- MACD reporting
- Transactional data and details
- Historical information
- Etc...

If you've embraced consolidation, own the asset and embrace TEM, these items are TABLE STAKES moving forward!

# Utilizing BI for Mobility

The real value in BI for mobility is in supplier and market performance - holding your providers accountable for the experience they committed to, and enabling your organization with information that is near real time and drawing on multiple sources:

- SLA's, KPI data (internal and external dimensions) blended with transactional data
- Leverage as it relates to the broader marketplace, emerging technology options and competitive landscape
- Intellectual property related to asset and technology maturity
- Proactive optimization of the program, financial proposition and efficiency factor within the organization

## Wireless Criteria – Dimensions of Performance

<u>MARKET</u>	<u>TECHNOLOGY</u>	<u>INNOVATION</u>	<u>TACTICAL</u>	<u>STRATEGIC</u>	<u>INTERNAL</u>
<ul style="list-style-type: none"><li>•Revenue source</li><li>•CPGA</li><li>•ARPU</li><li>•Churn</li><li>•Forecast</li><li>•Rate points</li></ul>	<ul style="list-style-type: none"><li>•CAPEX</li><li>•OPEX</li><li>•Spectrum assets</li><li>•Maturity</li><li>•Clarity of path</li><li>•Quality</li></ul>	<ul style="list-style-type: none"><li>•Rate structures</li><li>•Feature sets</li><li>•Capabilities</li><li>•Field force</li><li>•Deployed tech</li><li>•Flexibility</li></ul>	<ul style="list-style-type: none"><li>•Provisioning</li><li>•MACD</li><li>•Deactivation</li><li>•Escalation</li><li>•Service quality</li></ul>	<ul style="list-style-type: none"><li>•Stewardship</li><li>•Leadership</li><li>•Relationship maps</li><li>•Roadmap</li></ul>	<ul style="list-style-type: none"><li>•Net costs</li><li>•Perception</li><li>•Device churn</li><li>•Service churn</li><li>•MACD volume</li><li>•Contract leverage</li></ul>

Thank You!

## Q & A
